## **MATH COURSES:**

Our math courses require the regular use of calculators. **Phones are not a substitute for calculators.** In Algebra 1, students will begin using calculators for necessary concepts and need specific functions. The TI 30 XS Multiview is the preferred calculator. This can be used in Geometry as well. If you want to invest in the graphing calculator now for your student to use throughout high school, the Numworks graphing calculator is the preferred graphing calculator. Please know that if something happens to the graphing calculator, it will need to be replaced for their upper-level courses.
