The TI30XS Multiview is the preferred calculator, but the TI34 Multiview is also acceptable. This will be used in Geometry as well. If you want to invest in the graphing calculator now, your student will be able to use it all the way through. Please realize that if something happens to the graphing calculator, it will need to be replaced for their upper level math and science classes

**Algebra 2, Pre- Calculus, AP Calculus, Statistics, and AP Chemistry** - students will need the graphing calculator TI84 can use the general version but the TI 84 CE is the color version and is very helpful for calculus.
